

D.T.E. 01-08

Assessments applied to selected utility companies owning or having entitlements to electric power from certain nuclear generating facilities inside and outside of Massachusetts for the purpose of reimbursing the Commonwealth for expenditures incurred by the Massachusetts Energy Management Agency related to such facilities pursuant to Section 2 of Chapter 159 of the Acts of 2000.

Massachusetts Emergency Management Agency

Nuclear Safety Preparedness Program

for Fiscal Year 2000

(Appropriation Item Nos. 8800-0100, 8800-0200)

On December 6, 2000, the Massachusetts Emergency Management Agency, pursuant to Section 2 of Chapter 159 of the Acts of 2000, requested that the Department of Telecommunications and Energy ("Department") establish an apportionment and make an assessment against nuclear regulatory commission licensees operating nuclear power generating facilities located inside the Commonwealth and electric companies in the Commonwealth that own, in whole or in part, or purchase power from, nuclear power plants outside the Commonwealth but within ten miles of Massachusetts cities or towns. On February 23, 2000, the Department made similar assessments for Fiscal Year 2000 totaling \$701,082 to fund expenditures required by Section 2 of Chapter 127 of the Acts of 1999. See D.T.E. 00-23. Because the Pilgrim Nuclear Power Station is the only nuclear power station generating electricity in the Commonwealth, Entergy Nuclear Generation Company ("Entergy"), by letter dated January 3, 2001, has agreed to be responsible for the entire assessment of \$431,735 for nuclear power plants in Massachusetts, pursuant to Item 8800-0100 of Section 2 of Chapter 159 of the Acts of 2000.

In D.T.E. 00-23, D.T.E. 99-14, D.T.E. 98-37, and D.P.U. 97-19, D.P.U. 95-124, and D.P.U. 94-179, the Department determined that an equitable method of allocating costs

for nuclear power plants located outside the Commonwealth but within ten miles of Massachusetts cities or towns was on the basis of the entitlement of Massachusetts utilities to power from the Seabrook and Vermont Yankee nuclear power plants. For the purpose of this assessment, the same method will be followed. Further, consistent with previous orders, the Department is using entitlements as of December 31, 1999, as a basis for the assessment.

The Department determines that the following companies shall be assessed on each of their respective shares of the companies' combined megawatt ("MW") entitlement of both Seabrook and Vermont Yankee nuclear power plants. Therefore, the Department makes the following assessments:
